

Registration: N121AF
Serial Number: TH-1254
1981 Beechcraft 58 Baron
Located at St. Augustine FL, KSGJ

BDKC Aviation is proud to offer this 1981 Baron 58 with NEW Engines, NEW Props and beautifully upgraded avionics! This Baron has been meticulously maintained and cared for, always hangered, and flown regularly (see Flightaware). It's very rare to find a light twin that has already had all the upgrades already done. Avoid the months of hangar and insurance expense while you wait for installs. This plane is ready to go!

This 1981 Baron 58 has only 5535 Total Time and each engine has only 133 hours since major overhaul by JB Aircraft Engine Service in Sebring Florida in 2021. The brand new Hartzell composition aluminum, three blade propellers are 0 time and installed in January 2024. The owner has made significant upgrades to the panel including twin Garmin G5's (Horizon and HSI), a Garmin GTN 750/650Xi stack, a Garmin GFC 600 autopilot with yaw damper and a JPI EDM 960. This Baron has excellent performance delivering 175 Kts TAS at 10,000 feet with WOT at 2300 rpm at 22 gph.

Other upgrades include: Garmin GTX 345, Garmin GMA 35c, Flight Stream 510, JPI EDM 960, GAMI injectors, dual yoke, 166 Gal tanks, CiES digital fuel sensors, traffic awareness, upgraded digital LED landing and Nav lights, new front tire, 2 new Concorde batteries, and 2 new starters. Useful Load is 1673 lbs. with large double doors opening into the spacious rear cabin. Times subject to change, still flown regularly and always Hangared.

I've included a spec sheet below which has a Dropbox with the logbooks, photo gallery, etc. Please email or call anytime to discuss this wonderful example of a highly-cared for and loved Baron 58.

Thank you!
-Bruce
