

12 Pa-22 aircraft were flown by the French Marine Corps. Below is the their unit insignia which is on the front cowl of N2650A. The Naval Anchor and rope signify the ship to shore Marine Corps mission, the blue of North Africa has a Pa-22 in flight and unit 1 of the First Air Group. "GALTOM" translated from the French Military

acronym is: Light ground attack aircraft, observation.

The english translation of
"PLUS EST EN NOUS"

" WE ARE THE ADDED PLUS".

WEAPONS AND MISSION OPTIONS:

All western armies after WW2 looked like the US ARMY from weapons and uniforms to helmets. As a result 30 cal. Browning Light Machine Guns and Garand 30 Cal Paratrooper Carbines flew along side Pa 22 aircrews. Hand grenades in mason glass jars, M-18 smoke and the South Africans dropped external 50 kilo smoke and fragmentation bombs.

This writer used actual GI vehicle 30 Cal MG mount and ammo cans that flew as ground suppression weapons on Pa-22's. The French Marine Corps crews liked the high wing for sun shade and observation doors for terrain scanning.

Replica Browning 30 Cal. Machine Gun, 30 cal. ammo and restored original WW2 ammo cans.
