

Aventura Listing

AVENTURA-II 2002

Aircraft under current/ongoing restoration and upgrading. Bought as a project, original logs lost. Last A/W cert: 10/15/02. Hasn't flown since before I bought in 2014. I had the engine inspected, oil, filters and plugs replaced and test run shortly after delivery and hangared ever since. Hand propped 3 or 4 times / yr to keep engine free moving. That stated, there is very minimal work time to restore to A/W status. After factory owner made in person inspection his estimated time to flight condition was about 2 weeks of diligent work. With few exceptions everything is there and just needs more hands on time commitment than I could or can provide.
