| :---: | :---: | :---: | :---: |
| Width | 97 | 8.1 | 2.46 m |
| Floor Height (adjustable) | 16 | 1.3 | 0.41 m |
| Height with ramps up | 64 | 5.3 | 1.63 m |
| Trailer Weight | 343 pounds | 24.5 <br> stone | 156 kg |

Low Profile mode explained: To get the wing to the lowest possible height, take the wing control bar out of its trailering cradles and rest it on the frame. It is a great way to get the wing a few inches lower, but it is not suitable to trailer down the road like that. For trailering, secure the control bar in the cradles.
