OVERVIEW

The Cessna 320 Skynight is the successor to the popular Cessna 310. Although only 577 airframes of the 320 series aircraft were produced, they featured the kind of engineering and aerodynamics that has made Cessna an industry leader in general aviation and light utility aircraft.

Based on the 310F variant, the Cessna 320 was slightly enlarged with six seats, a larger interior cabin volume, and turbocharged engines. Although the ride may be more comfortable for crew and passengers alike, the overall payload gain was negligible, only about an additional 100 lbs. over a Cessna 310. The real advantage, besides comfort, comes from a 17% greater cruise speed, moving the aircraft and its payload further, faster.

N5769X is a classic 320 that's been maintained by one of the most reputable shops in the American Southwest. The level of professionalism in this aircraft's pedigree make it substantially better than almost any other 320 still flying today. The value of thirty-three years of meticulous maintenance cannot be overstated, nor can it be replicated. An added benefit, the majority of the aircraft's service life has been in low-humidity climates, adding to its overall protection and robust showing.

With below average total time and superior maintenance history, this is a 320 that's worth a hard look.
