

FOR SALE

Sonex, two-seat, experimental aircraft. Original model (A) with conventional tail and gear. Purchased in 2014 as a quick-build kit. Partially completed. Serial number: 1667

Includes:

Rolling fuselage with structurally completed empennage and seat area. Dual controls and disc brake upgrade.

Structurally completed wings except for control surfaces.

AeroVee 2.1 engine, 80 HP, still in the original, unopened boxes from Sonex. Cooling baffles kit and pre-installed crankshaft service upgrades. (Current cost approximately \$13,000 as of Feb 2026)

Fastener and accessories kit from WB Parts plus various additional hardware.

Almost all associated parts that are necessary for completion except for propeller and avionics.

Build book and hundreds of photos plus factory communications.

Wheel realignment may be necessary.

Sonex factory accepts transfer of license.

Buyer becomes builder of record, with all privileges granted under FAA regulations.

Sold as is with signature of liability waiver required.

Motivated to sell - Make offer

(Equivalent cost for Sonex-B with engine as of Feb 2026: Approximately \$65,000 – not including construction completed)
