

## Quicksilver MX

\$5000

Rotax 40hp 447 with 75 hrs TSO, Two Axis control, non steering nose wheel, wings clipped to 26'- 8", sails are faded, but pass fabric tests. I bought this 6 years ago as a project and slowly rebuilt the trike;

- Replaced fasteners with new AN hardware
- Cleaned, inspected and shrink covered the tubes
- New 4 pt harness
- New seat cover padding
- Instrument pod, tach, egt, GPS ground speed
- Wigwag nose recognition lights • New wheels& tires
- LED tail beacon
- In flight adjustable elevator trim
- New fuse box, 12 volt rectifier
- Keyed kill switch
- EGT & gauge
- CHT senders
- New fuel lines, filter & shut off valve
- Wired for LED Nav Lights and tip strobes (included).

Basically, all the tedious work has been done for you. If kept it, I'd add a new tapered tail, maybe a steerable nose wheel. Sold as a project. Pick up Only. Located in S/W Montana KHRF (Hamilton, Bitterroot Valley) NO TRADES
