

## N667RV

N667RV is an exceptional RV-12 built by our good friend, who is a highly skilled and experienced aircraft builder. The stylish and sporty paint scheme turns heads and creates smiles. Inside you'll find a state-of-the-art Dynon HDX avionics package with truly incredible capabilities. Her Rotax 912ULS engine is smooth, dependable, and doesn't leak oil. This airplane is completely dialed-in, with no squawks... Just turn the key and go anywhere. Featuring a blend of performance, comfort, and economy, you'll appreciate everything this airplane has to offer every time you fly.

N667RV has been based at KPRC in Prescott, Arizona her whole life. We are the 3<sup>rd</sup> owners and are personal friends with the previous owner and the builder. We know the airplane inside and out. There is no damage history. She has always lived in a hangar in the dry Arizona climate. There is no corrosion or rust. Even her belly is spotless.
