

BREEZE RESCUE HOISTS - FOR SALE

Two hoist assemblies, associated components/spares and technical manuals

Lot	Complete package - offered as one lot
Equipment	Two Breeze rescue hoist assemblies plus associated loose parts, cables, fittings and manuals
Condition	Used / stored condition. Cosmetic wear visible. Functional condition unknown.
History	UNKNOWN - no service history, log cards, release documentation or traceability available from seller.
Airworthiness	NOT represented or offered as airworthy or serviceable.
Sale basis	As-is, where-is. Buyer inspection strongly encouraged before purchase.

IMPORTANT CONDITION / TRACEABILITY NOTICE

These items have unknown history and are being sold without aircraft records, component history, certification, release documentation or traceability. The seller has not tested, inspected, overhauled or verified the equipment and makes no representation that any item is serviceable, airworthy, complete, within life limits, eligible for installation, or suitable for any particular aircraft or operation.

The purchaser is responsible for identification, applicability, inspection, testing, overhaul/repair, certification and determining whether any item may lawfully or safely be returned to service. Any aviation use must be subject to the applicable approved maintenance data and regulatory requirements.

The photographs form part of the description. Contents are offered only as shown; no representation is made that every loose part belongs to either hoist or that the package is complete.

WHAT IS INCLUDED

The lot appears to include the following items based on visual inspection only. Part numbers, serial numbers and exact configuration should be confirmed by the purchaser from the equipment data plates and manuals.

- 2 x Breeze rescue hoist assemblies with cable drums, mounting/support structures and associated mechanisms.
- Associated electrical/control boxes and wiring/cable assemblies.
- Loose hoist-related fittings, brackets, hardware, electrical components and miscellaneous spares.
- Additional structural/mounting pieces and cable/line assemblies visible in the photographs.
- Breeze Rescue Hoist technical/manual set, including operation, illustrated parts breakdown, servicing schedules and modifications documentation.

SELLING POSITION

This is intended as a clearance sale of an unverified aviation equipment lot. It is best suited to a specialist, overhaul organisation, operator or collector who can independently identify and evaluate the equipment.

Suggested listing wording: "Two Breeze rescue hoists with spares and manuals. History and serviceability unknown. No traceability or release paperwork. Sold strictly as an unverified lot for inspection, overhaul, parts or other lawful use. Not represented as airworthy or ready for installation. Buyer to satisfy themselves as to identity, completeness, condition and applicability before purchase."

Commercial terms: Price by offer / quick-sale basis. Inspection welcomed. Freight, packing, insurance, import/export requirements and all subsequent certification are purchaser's responsibility unless otherwise agreed in writing.

Note: 'As-is' wording does not necessarily exclude rights or obligations that cannot legally be excluded. For a material-value transaction, use a written sale agreement appropriate to the buyer and jurisdiction.
