Maintenance & Records

- Fresh condition inspection completed by an A&P in July 2026
- Complete logs back to the original builder
- Maintenance kept current during present ownership

- Aircraft experienced a period of inactivity around 2013 but has since been regularly flown, maintained, and inspected
- Previous pre-purchase inspection documentation available

Known Condition Item

Several small cracks are present in the canopy around mounting points. These were stop-drilled by the previous owner and have remained stable for years. This has been taken into account in the asking price.

Observed Performance

- 150+ mph TAS at altitude under favorable conditions
- Approx. 6 GPH fuel burn in cruise

Asking Price

\$30,900 OBO

Additional photos, logbook information, maintenance records, and previous pre-buy documentation available to serious buyers.
