

VELOCITY 173 RG ELITE

UNFINISHED EXPERIMENTAL AIRCRAFT PROJECT | \$109,500 OBO

AIRCRAFT

Four-place composite canard aircraft; retractable tricycle landing gear; gull-wing doors; rear-mounted pusher engine. Aircraft has never flown. Located in a hangar at Corona Municipal Airport (KAJO), California.

ENGINE

Performance Aero Engines IO-540-EXP experimental engine, rated 300 HP at 2,700 RPM; fuel injected, with dual Light Speed Engineering electronic ignition. Performance Aero Stage III overhaul dated August 6, 2001. Zero operating hours since that overhaul, per owner. Extended storage warrants inspection and evaluation before operation.

PROPELLER

Four-blade MT constant-speed propeller. Exact model and condition to be confirmed during inspection.

AVIONICS INCLUDED

Dynon EFIS-D100 electronic flight display; Dynon engine monitoring instrumentation; Bendix/King KLX 135A GPS/COM; Apollo GX60 GPS/COM; VAL NAV 2000 VOR/ILS; PMA6000B audio panel/intercom; TruTrak autopilot; Narco AT150 transponder; **new uAvionix tailBeacon ADS-B Out**. Radios are not represented as new. Some avionics have been bench-powered; final installation, integration and operational testing remain.

PROJECT HISTORY

Initial construction began at the Velocity factory in Florida. The current owner purchased the unfinished aircraft through the owner of Velocity Aircraft. The project was transported to California, where work continued. Velocity builder manuals and available construction documentation are included.

COMPLETION STATUS

Unfinished project, sold as-is and not currently airworthy. Further construction, composite finishing, systems and avionics completion, inspections and flight testing are required. Prospective purchasers should inspect the aircraft and records to determine completeness and condition. No flight performance figures have been established for this airframe.

REASON FOR SALE

Owner is retiring from flying and hopes to find an experienced builder who will complete the aircraft.

ASKING PRICE: \$109,500 OBO
